

JANUARY FUN FLY

The January fun fly was a great success. Eight flyers turned out to try their skill and try and beat the odds against CD Rich and a few did there were a few mishaps but nothing serious and we are looking forward to the next fun fly.

Pilot Station Plane Restraints

The new barriers at the pilot stations were installed by Ron Melick and Ed Rouisse last week and are working fine. We wish that everyone would

use them while flying and give any feed back to the officers as to any improvements that need to be made to them.

New pilot station restraints install by Ron Melick and Ed Rouisse. Good job guys.

Ed Says

Ed. says this month words of wisdom for the month of February is that we are now into our new year. Let's make a new year resolution that we are going to make this year not only a good year but an exceptional year of flying pleasure.

We have all the tools we need for this to happen. Like, we have a very good field, and a great bunch of guys that's only interest is to promote a great flying society. Our attitudes are definitely in a positive mode and those who are not so inclined we are keep-

ing close watch on. Our very active board of directors only purpose is to see a tremendous very successful year. One, with plenty of good flying, and one without hazards or mishaps and to deal with any of these infringements, with total quickness and fairness.

We do have some rough edges but we are doing everything possible to sand paper those edges to smoothness. For an organization as big as ours, work is always required to maintain perfection, but the continued help

of all concerned, and with the co operation from most of our members total perfection is well within our sight.

So bring along your positive attitudes and leave your worries and negative ness behind. We not only have what it takes to be successful but to be the very best there is in flying enjoyment.

Ed. Rouisse

Special Thanks

We would like to thank Barbara Henry and Leda Winn for there hard work cooking for the fun fly in January. It was a cool morning to start out but warmed up quickly and everyone filled there stomachs with good food, this was a freebie from the club with food left over from the Appreciation Day so don't expect it at all fun fly's.

Mall show date set

The date for the mall show has been set for March 31st and April 1, 2007 to be held at the Seminole Mall located at the intersection of Park Blvd and 113th Street in Seminole. This is going to be a 2 day show. We hope everyone will take part in the show. Dick Gifford is going to have a sign up sheet at the February meeting so you can sign up

for the time you can work the show he will also have a sign up sheet for what plane you would like to display, one per person as space will be limited. If you have some old Model magazines you would like to get rid of bring them I'm sure some young aspiring person would enjoy reading about our sport.

Guess what a sign up sheet?????

FUN FLY CANCER DRIVE

Our Flight for Cancer, every year everyone pulls together to fight cancer. Why not us? How you might ask? Well we have airplanes, we have a great flying field and there are people out there who would pay, (at least five dollars per flight) to see our planes do there thing. How simple is that? We would be more than willing to fly our planes to help the cause of solving the problem of cancer. If this little event brings everyone, one little very small step closer to solving this problem of cancer, we would all benefit from that. What

would we have to do to accomplish this great get together?

Have all those who have good flying airplanes show up at the field with their masterpieces. Line the airplanes up facing the crowd with a number in front of them, for easy selection from the crowd. Anyone in the crowd that is willing to fork out a donation, say five dollars or more, to see a particular airplane fly, can see that particular airplane do its thing.

All proceeds plus a little donation from the clubs finances will be delivered to St. Jude's or a similar organization who is trying to conquer the

disease of cancer.

It's that simple. The cancer research will benefit. Members will be very proud of their display and contribution and the crowd will get to see spectacular flying, plus the club will receive some benefit from the good publicity.

Ed. Rouisse

Pictures from the past??

Military Humor (and Wisdom)

“It is generally inadvisable and unhealthy to eject directly over the area you just bombed (U.S. Air Force Manual)

“You’ve never been lost until you’ve been lost at Mach 3.” Paul F. Crickmore (test pilot)

“When one engine fails on a twin-engine airplane you always have enough power left to get you to the scene of the crash.”

Airspeed, altitude and brains. Two are always needed to successfully complete the flight.

“Never trade luck for skill”

“A smooth carrier landing is mostly luck; two in a row is all luck; three in a row is prevarication.”

COME FLY
WITH US

The Largo Flying Club is 10 years old and growing, always looking for new members. The purpose of the club shall be to provide leadership in the modeling community and to promote safety in modeling as a hobby/sport: to give flying instruction, to help juniors and seniors in the hobby sport of model aircraft; to provide and maintain an adequate flying site for radio-controlled model aircraft. For further information contact our President Don Piotter, 727-588-1302

PARKING-PARKING-PARKING

Parking during the fun fly's !!!!!

Please during the fun fly's if you are not participating (flying your plane) don't park in front of the pilot stations. This causes the pilots to park away from the stations and carry their planes and gear to the flight line, please be more considerate it could happen to you!!!!

There is plenty of parking space and not to far to walk,

Thanks, from your board of directors....
